1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The meaning of "multipart" is not clear from the written description. Please clarify and/or point out where the precise structure of such is described.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2835

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1,2,7-13,15,18-20,22,24,25,27 and 28 are rejected under 35

U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Pautsch.

Chip/die cooling through ports that "allow" various capabilities are clearly shown, as are all other claim details. If such is argued, Hembree and Root (which are not applied) show that direct cooling of dies is old and well known and notice is taken thereof. O-rings are also present, and the use of valves to control fluid flow in such systems is notoriously known.

6. Claims 1,7-11 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Kieda et al.

The chip/die cooling is clearly seen in the figures of the reference.

7. Claims 3-6,14,16,17,21,23 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pautsch taken with Khandros(211 or 707).

The primary reference lacks a discussion of compliant spring contacts, while the secondary references show that such is well known.

In addition, Khandros 707 shows plural boards compliant interconnects are also well known. Modifying Pautsch in view of either secondary reference to include the parts discussed above would clearly have been obvious to connect the parts together in a flexible manner.

8. Note that the other cited but not applied art is quite similar.
